## INTRODUCTION

Grant Agreement Preparation Forms (GPF's) have been designed to facilitate the project negotiations and the production of the grant agreement. It is a main communication instruments between the co-ordinator representing the Consortium and the Commission 's Project Officer. Essentially the forms are used to identify the beneficiaries that will sign/accede to the grant agreement, to determine the eligible costs and European Union contribution and to electronically capture structured information on work packages, efforts, milestones and deliverables . The forms also include a standard declaration to be signed by each participating organisation.

To assist the filling in of the GPF's the following is made available:

- Annotations – these are attached to the standard forms and should be read carefully
- Pre-filled legal information (see below)
- NEF – NEF is an online tool to be used by the co-ordinator and the beneficiaries to edit the content of the GPF's

Legal information is held in the A2.1 form. This information is pre-filled by the Commission services using either information taken from the Commission database or from the proposal. Depending on the validity of this information, the organisation concerned may have to supply to the Commission with a so called "identification fiche" and supporting legal documents. For instructions on this, see the annotations to the A2.1 form.

The budget table (A3.2) is to be used in Part A of Annex I of the grant agreement.

Project title <sup>3</sup>	Operational Potential of Ecosystem Research Applications		
Starting date <sup>4</sup>	01/12/2012		
Duration in months <sup>5</sup>	60		
Call (part) identifier <sup>6</sup>	FP7-ENV-2012-two-stage		
Activity code(s) most relevant to your topic <sup>7</sup>	ENV.2012.6.2-1 : Exploration of the operational potential of the concepts of ecosystem services and natural capital to systematically inform sustainable land, water and urban management		

**Abstract <sup>9</sup> (max. 3000 char.)**

Human use and exploitation of the biosphere is increasing at such a pace and scale that the sustainability of major ecosystems is threatened, and may not be able to continue to function in ways that are vital to the existence of humanity. Re-framing environmental resource use has led to the emergence of the concepts of ecosystem services (ES) and natural capital (NC). This discourse indicates not only a change in our understanding of planetary functions at the ecosystem scale, but also a fundamental shift in how we perceive the relationship between people and the ecosystems on which they depend. OPERAs (OPERATIONAL POTENTIAL OF ECOSYSTEMS RESEARCH APPLICATIONS) aims to improve understanding of how ES/NC contribute to human well-being in different social-ecological systems in inland and coastal zones, in rural and urban areas, related to different ecosystems including forests and fresh water resources. The OPERAs research will establish whether, how and under what conditions the ES/NC concepts can move beyond the academic domain towards practical implementation in support of sustainable ecosystem management. OPERAs will use a meta-analysis (systematic review) of existing ES/NC practice to identify knowledge gaps and requirements for new policy options and instruments. New insights, and improved or novel tools and instruments, will be tested in practice in exemplar case studies in a range of socio-ecological systems across locales, sectors, scales and time. Throughout this iterative process, available resources and tools will be brought together in a 'Resource Hub', a web-based portal that will be co-developed by scientists and practitioners representing different interests and perspectives on the development, communication and implementation of the ES/NC concepts. The Resource Hub will provide the main interface between OPERAs and a 'Community of Excellence' (CoE) for continued practice that will benefit from OPERAs outcomes.

### **32. SME**

SME means micro, small and medium sized enterprise within the meaning of Recommendation 2003/361/EC in the version of 6 May 2003 (see [http://ec.europa.eu/enterprise/enterprise\\_policy/sme\\_definition/index\\_en.htm](http://ec.europa.eu/enterprise/enterprise_policy/sme_definition/index_en.htm)).

An enterprise is considered as an SME, taking into account its partner enterprises and/or linked enterprises (please see the above mentioned recommendation for an explanation of these notions and their impact on the definition), if it:

- employs fewer than 250 persons
- has an annual turnover not exceeding EUR 50 million, and/or
- an annual balance sheet total not exceeding EUR 43 million
- is autonomous

The headcount corresponds to the number of annual work units (AWU), i.e. the number of persons who worked full-time within the enterprise in question or on its behalf during the entire reference year under consideration. The work of persons who have not worked the full year, the work of those who have worked part-time, regardless of duration, and the work of seasonal workers are counted as fractions of AWU. The staff consists of:

- employees;
- persons working for the enterprise being subordinated to it and deemed to be employees under national law;
- owner-managers;
- is autonomous

partners engaging in a regular activity in the enterprise and benefiting from financial advantages from the enterprise.

ATTENTION: Apprentices or students engaged in vocational training with an apprenticeship or vocational training contract can not be included as staff. The duration of maternity or parental leaves is also not counted.

The data to apply to the financial amounts (e.g. turnover and balance sheet), as well as to the headcount of staff, are those relating to the latest approved accounting period and calculated on an annual basis. They are taken into account from the date of closure of the accounts. The amount selected for the turnover is calculated excluding value added tax (VAT) and other indirect taxes.

In the case of newly-established enterprises whose accounts have not yet been approved, the data to apply is to be derived from a bona fide estimate made in the course of the financial year. These organisations must insert "N/A" for the two questions relating to the duration and the closing date of their last approved accounting period.

### **33. Non-SME**

An enterprise that is not an SME.

### **34. Title**

Please choose one of the following: Prof., Dr., Mr., Ms.

### **35. Gender**

This information is required for statistical purposes. Please indicate with an F for female or an M for male as appropriate.

### **36. Position**

Please indicate the position in your organisation e.g. Rector, President, Chief Executive Officer, Director etc.

### **37. Department/faculty/institute/laboratory name/...**

Please indicate here the postal address for contact purposes.

### **38. Signature**

### **40. Funding % for RTD/Innovation activities**

For research and technological development activities, the European Union financial contribution may reach a maximum of 50% of the total eligible costs.

However, for beneficiaries that are non-profit public bodies, secondary and higher education establishments, research organisations and SMEs, the rate may reach a maximum of 75% of the total eligible costs. If these beneficiaries change their status during the life of the project, this reimbursement rate shall be applicable up to the moment they lose their status.

#### **41. Indirect costs**

Indirect costs are all those eligible costs which cannot be identified by the beneficiary as being directly attributed to the project, but which can be identified and justified by its accounting system as being incurred in direct relationship with the eligible direct costs attributed to the project. They may not include any eligible costs.

#### **42. Actual indirect costs**

Beneficiaries who have an analytical accounting system to identify their indirect costs are allowed to claim actual indirect costs.

#### **43. Simplified method**

If it is in accordance with its usual accounting and management principles and practices, a beneficiary is allowed to use a simplified method of calculation of its full indirect eligible cost at the level of its legal entity. Use of such a method is only acceptable where the lack of analytical accounting or the legal requirement to use a form of cash-based accounting prevents detailed cost allocation. The simplified approach must be based on actual costs derived from the financial accounts of the period in question.

#### **44. Standard flat rate**

A beneficiary may opt for a flat rate of 20% of its total eligible costs excluding the costs for subcontracting and the costs of reimbursement of resources made available by third parties that are not used on the premises of the beneficiary

#### **45. Special transitional flat rate**

Non-profit public bodies, secondary and higher education establishments, and research organisations and SMEs, which are – due to the lack of analytical accounting – unable to identify with certainty their real indirect costs for the project, when participating in funding schemes which include research and technological development and demonstration activities, as referred to in the table of Article II.16 of the grant agreement, may opt for a flat-rate of 60% of the total direct eligible costs excluding costs for subcontracting and the costs of reimbursement of resources made available by third parties which are not used on the premises of the beneficiary. If these beneficiaries change their status during the life of the project, this flat rate shall be applicable up to the moment they lose their status.

#### **46. ICPC**

If you are participating from an International Cooperation Partner Country (ICPC), you can opt for lump sum funding instead of reimbursement of eligible costs.

#### **47. Funding % for Coordination/Support activities**

The European Union financial contribution may reach a maximum of 100% of the total eligible costs.

#### **48. Maximum reimbursement of indirect costs**

In the case of coordination and support actions, reimbursement of indirect eligible costs for every beneficiary may reach a maximum of 7% of the direct eligible costs, excluding the direct eligible costs for subcontracting and the costs of reimbursement of resources made available by third parties which are not used on the premises of the beneficiary.

#### **49. Funding % for RTD**

For research and technological development activities, the European Union financial contribution may reach a maximum of 50% of the total eligible costs.

However, for beneficiaries that are non-profit public bodies, secondary and higher education establishments, research organisations and SMEs, the rate may reach a maximum of 75% of the total eligible costs. If these beneficiaries change their status during the life of the project, this reimbursement rate shall be applicable up to the moment they lose their status.

#### **50. Account name**

The name or title under which the account has been opened and not the name of the authorised agent.

#### **51. IBAN**

If the IBAN code (International Bank Account Number) is applied in the country where your bank is situated.

#### **52. Bank stamp + signature bank representative**

The bank stamp and signature of its representative are not required if this form is accompanied by a copy of a bank statement.

#### **100. Entities composed of one or more legal entities**

European Economic Interest Group / Joint Research Unit (Unité mixte de recherche) / Enterprise groupings.
